

# Applied Planning- Environmental Program

Build your career brand in the Applied Planning - Environmental Program at Fleming College which focuses on sustainability in development projects for urban and regional land use. After graduation you will be able to utilize your new planning skills, together with your environmental/sustainability/science/engineering-related degree or diploma, to assist organizations in their planning processes.

Working with professional planners as a planning technician, planning assistant or scientist, you will help to promote healthy and sustainable communities.
