

# Health Information Management Program

Build your career brand in the Health Information Management Program at Fleming College, one of only three programs in Ontario recognized by the Canadian Health Information Management Association. You will graduate equipped with very marketable skills in the health information management sector. Some of those skills will include expertise in the following areas: data quality; data collection and coding; record /systems management; privacy, confidentiality and security of health information; transitioning to the electronic health record.

Graduates will be qualified for employment in a variety of health service settings and can choose the area that most interests them, including hospitals, chronic and long-term care facilities, community healthcare, mental health agencies, rehabilitation services, private clinics, health information networks, insurance and pharmaceutical industries, and government agencies and services.
